

LAPORAN AUDIT STATUS API & GAP ANALYSIS UI/UX EVENTDAY

REVISED ARCHITECTURE (rev. 14 Dual-Alias & Base /api Standard — HEAD 6e7bcfd)

Workspace: D:\eventday

Tanggal Audit: 17 September 2026

Target Spec: v1.3.0 (98 Path Unik Terverifikasi)

Status Verifikasi: PR #23-#25 Merged, Dual-Alias Admin, Base /api Non-V1

98 TOTAL PATH UNIK TERKATALOG	79 REAL (PERSISTEN DB)	17 MOCK / STUB ACTIVE	2 DIHAPUS DARI KODE	0 BUG PATH (ALL FIXED)
-------------------------------------	------------------------------	-----------------------------	---------------------------	------------------------------

LEGENDA STATUS:

REAL (Persisten DB / Hybrid)

MOCK / STUB (Active)

PUBLIC (Legal Fixed)

TABLE RISK (Sharing)

DIHAPUS

1. REKAPITULASI PER MODUL (SCAN ACTUAL BACKEND REV.14 — STANDAR NON-V1)

MODUL	TARGET	STATUS SAAT INI	KETERANGAN & KEPUTUSAN TEKNIS
01. Home & Search	6	6/6 REAL (100%)	HomeController.java: hero-banner, event-card, search results, locations & categories publik persisten DB (base /api).
02. Events & Detail	4	3 REAL / 1 MOCK STUB	GET /events, featured, & detail REAL. Facilities raw string. POST /api/events/create ADA (MOCK STUB Publik rev.13).
03. Auth & Account	6	6/6 REAL (100%)	AuthController.java: register (paksa CUSTOMER), login JWT Cookie, Google OAuth, OTP Mailtrap, reset-password di auth.
04. Checkout & Order	8	8/8 REAL (100%)	CheckoutController.java: initiate, attendees real (order_attendees), calculation (tax 10%), process, status & summary.
05. Payment Gateway	4	1 REAL / 1 PUBLIK LOG 2 DIHAPUS	Midtrans Snap REAL (/api/payments/charge). Webhook log-only PUBLIK. Endpoint Virtual Account legacy DIHAPUS.
06. My Tickets & Scan	4	4/4 REAL (100%)	TicketController.java: tickets by email, my-tickets alias, issued-detail (E-Ticket), scan QR code REAL. Base path /api/tickets.
07. User Profile & Trans	6	6/6 REAL (100%)	UserController.java: Profile, update (NIK unik), change password (email), logout, transaksi. Avatar REAL (PR #24, WebConfig).
08. Refund Customer	6 (7)	4 REAL / 1 MOCK 1 PARTIAL	Base /api/refund & /api/tickets/refund. Submit hitung real, order-summary REAL. Banks MOCK (8 bank). Proof URL partial.
09. Admin Backoffice	20	20 REAL (4 Risk Table Sharing)	Dual Alias: Dapat diakses via /api/admin/** maupun /admin/** (Dashboard 3, Users 4, Settings 6, EO 4, Payouts 4).
10. Organizer Portal	29	18 REAL (HYBRID) 11 MOCK / STUB	Base /api/organizer. 18 Hybrid DB-backed (PR #21) + 9 Stub Baru PR #25 (events & dashboard) + 2 stub (logout, payout-detail).
11. Legal Content	4 (2)	4/4 PUBLIK (FIXED)	Dual mapping root & /api/* + permitAll 4 path. Konten kaya (slug/sections/HTML). Publik tanpa login.

2. DAFTAR RINCI STATUS ENDPOINT ACTUAL (98 PATH UNIK TERVERIFIKASI)

A. Modul Auth, Home, Search, Events & Checkout (Real & Active — Base /api)

MODUL	METHOD	ENDPOINT TARGET	STATUS NYATA	KONDISI BACKEND & KEBUTUHAN
01. Auth Module	POST	/api/auth/register	SUDAH ADA	AuthService.register() → DB User & Auth, OTP Mailtrap
	POST	/api/auth/login	SUDAH ADA	AuthService.login() → Token JWT HttpOnly Cookie
	POST	/api/auth/google	SUDAH ADA	AuthService.loginWithGoogle() → Google GIS verify
	POST	/api/auth/verify-otp	SUDAH ADA	AuthService.verifyOtp() → Set status ACTIVE
	POST	/api/auth/resend-otp	SUDAH ADA	AuthService.resendOtp() → Kirim ulang OTP
	POST	/api/auth/reset-password	SUDAH ADA	AuthService.resetPassword() → 2-tahap di tabel auth
02. Home & Search	GET	/api/home/hero-banner	SUDAH ADA	Aktif di HomeController (max 5 featured)
	GET	/api/home/event-card	SUDAH ADA	Aktif di HomeController (DB paginasi)
	GET	/api/home/locations	SUDAH ADA	Distinct venueName dari DB Event publik
	GET	/api/search/results	SUDAH ADA	Multi-filter keyword, category, date, page, sort
	GET	/api/search/locations	SUDAH ADA	Filter lokasi search aktif persisten DB
	GET	/api/search/categories	SUDAH ADA	Filter distinct category event aktif
03. Events & Detail	GET	/api/events	SUDAH ADA	EventService.getEvents() → EventRepo (Publik)
	GET	/api/events/featured	SUDAH ADA	EventService.getFeaturedEvents() (max 3 hero)
	GET	/api/events/{id}	SUDAH ADA	EventService.getEventDetail() (facilities raw string)
	POST	/api/events/create	MOCK STUB	MOCK STUB Publik: 201 random UUID DRAFT (body diabaikan)
04. Checkout & Order	POST	/api/checkout/initiate	SUDAH ADA	OrderService.createOrder() → Order PENDING (15m)
	POST	/api/checkout/attendees	SUDAH ADA	Simpan ke tabel order_attendees (real, bukan stub)
	POST	/api/checkout/calculation	SUDAH ADA	Kalkulasi subtotal, tax 10%, diskon, totalAmount
	POST	/api/checkout/process	SUDAH ADA	Kunci status WAITING_PAYMENT (guard anti-downgrade)
	GET	/api/orders/status	SUDAH ADA	Polling status order aktif via orderId
	GET	/api/checkout/summary	SUDAH ADA	PaymentService.getCheckoutSummary() (ORD-XXXX)
	GET	/api/orders/{id}/total-amount	SUDAH ADA	Aktif di CheckoutController (total nominal)
	GET	/api/orders/{id}/expired-time	SUDAH ADA	Aktif di CheckoutController (batas bayar)

B. Modul Payment, Tickets, User, Refund & Legal (Base /api)

MODUL	METHOD	ENDPOINT TARGET	STATUS NYATA	KONDISI BACKEND & KEBUTUHAN
05. Payment Gateway	POST	/api/payments/charge	SUDAH ADA	Midtrans Snap sandbox REAL (snapToken, returnUrl)
	POST	/api/payments/midtrans-notification	PUBLIK LOG	PUBLIK: Webhook log-only (permitAll, belum update order)
	GET	/payments/methods	DIHAPUS	DIHAPUS — Dihapus permanen dari PaymentController
	GET	/payments/methods/virtual-account	DIHAPUS	DIHAPUS — Dihapus permanen dari PaymentController
06. My Tickets & Scan	GET	/api/tickets/user/{email}	SUDAH ADA	TicketService.getTicketsByEmail() (List TicketItem)
	GET	/api/tickets/my-tickets	SUDAH ADA	Alias fleksibel via param ?userEmail= (PR #12)
	GET	/api/tickets/issued-detail	SUDAH ADA	Detail E-Ticket (TicketDetailResponse via ticketCode UUID)
	POST	/api/tickets/scan	SUDAH ADA	TicketService.validateAndUseTicket() → CHECKED_IN
07. User & Transaksi	GET	/api/user/profile	SUDAH ADA	UserService.getProfile() via JWT authenticated userId
	PUT	/api/user/profile/save	SUDAH ADA	UserService.updateProfile() → cek NIK unik + audit
	PUT	/api/account/change-password	SUDAH ADA	UserService.changePassword() → BCrypt + email notif
	POST	/api/user/avatar	REAL	REAL: Validasi image/5MB, simpan disk, deserve WebConfig
	POST	/api/user/logout	SUDAH ADA	AuthService.logout() → token null & clear cookie (ACTIVE)
	GET	/api/transactions/history	SUDAH ADA	UserService.getTransactionHistory() → list pesanan user
08. Refund Module	POST	/api/tickets/refund/request	SUDAH ADA	submitRefund() REAL → amount real, organizerId terisi
	POST	/api/refund/submit	SUDAH ADA	Alias path permohonan refund pelanggan
	GET	/api/refund/banks	MOCK	8 Bank (BCA, Mandiri, BNI, BRI, CIMB, Permata, BSI, Danamon)
	GET	/api/refund/refund-detail/info	SUDAH ADA	RefundService.getRefundDetail() → DB findById
	GET	/api/tickets/refund/refund-history	SUDAH ADA	REAL: Kueri DB via findByCustomerId
	GET	/api/refund/order-summary	REAL	REAL: Hitung real dari order (fallback 295rb bila tak ada)
	GET	/api/refund/refund-detail/download-proof	PARTIAL	Endpoint REAL tapi proofUrl selalu "" (entity mismatch)
09. Legal Content	GET	/terms-conditions & /api/terms-conditions	PUBLIK (FIXED)	FIXED: Dual mapping + permitAll 4 path (verified live 200)
	GET	/privacy-policy & /api/privacy-policy	PUBLIK (FIXED)	FIXED: Dual mapping + permitAll 4 path (verified live 200)

3. PERMINTAAN TIM UI/UX & ARSITEKTUR BACKOFFICE

A. Modul Superadmin Backoffice (20 Endpoints Total — Dual Alias /api/admin & /admin)

AREA FITUR	METHOD	ENDPOINT TARGET	STATUS	KETERANGAN / KEPERLUAN BACKOFFICE
Admin Dashboard	GET	/api/admin/dashboard/metrics	SUDAH ADA	Metrik platform: omzet, event, user, tiket terjual
	GET	/api/admin/dashboard/recent-events	SUDAH ADA	Daftar event terbaru di platform
	GET	/api/admin/dashboard/recent-transactions	SUDAH ADA	Daftar transaksi pesanan tiket global terkini (dual-alias aktif)
Verifikasi Aplikasi EO	GET	/api/admin/eo-applications	SUDAH ADA	AdminEoService via entity Organizer (merge 4836263)
	GET	/api/admin/eo-applications/{id}	SUDAH ADA	Detail legalitas, NPWP, nama badan usaha, bank
	PATCH	/api/admin/eo-applications/{id}/status	SUDAH ADA	Approve/Reject EO → update role user (reason opsional)
	GET	/api/admin/eo-applications/{id}/documents/company-deed	SUDAH ADA	Akses dokumen akta perusahaan mitra organizer
Manajemen Pengguna	GET	/api/admin/users	SUDAH ADA	List master user platform (filter role)
	GET	/api/admin/users/{id}	SUDAH ADA	Rincian biodata profil & status akun user
	PATCH	/api/admin/users/{id}/status	SUDAH ADA	Update status ACTIVE/INACTIVE/SUSPENDED + audit
	PATCH	/api/admin/users/{id}/suspend	SUDAH ADA	Penangguhan akun langsung SUSPENDED + audit
Pencairan Dana (Payout)	GET	/api/admin/payouts	REAL (RISK)	SUDAH ADA: Sharing refund_requests (perlu discriminator)
	GET	/api/admin/payouts/{id}	SUDAH ADA	SUDAH ADA: PayoutDetailResponse lengkap
	PATCH	/api/admin/payouts/{id}/status	SUDAH ADA	SUDAH ADA: Approve/Reject + note & processedAt
	GET	/api/admin/payouts/{id}/documents/reconciliation	SUDAH ADA	SUDAH ADA: Link bukti rekonsiliasi transfer
Audit & Pengaturan	GET	/api/admin/audit-logs	SUDAH ADA	Log jejak audit admin persisten DB
	GET / PUT	/api/admin/settings/general	SUDAH ADA	GET & PUT Pengaturan umum sistem dari tabel settings
	GET	/api/admin/audit-logs/export	SUDAH ADA	BARU: Ekspor data log audit format JSON
	GET	/api/admin/audit-logs/export/csv	SUDAH ADA	BARU: Ekspor data audit trail format CSV string
	POST	/api/admin/settings/upload-logo	SUDAH ADA	BARU: Unggah logo resmi (≤5MB) ke uploads/logos/

B. Modul Organizer Portal (29 Endpoint: 18 HYBRID + 11 MOCK / STUB — Base /api/organizer)

AREA FITUR	METHOD	ENDPOINT TARGET	STATUS	KETERANGAN / KEPERLUAN UI
Profil & Legalitas EO	POST	/api/organizer/register	HYBRID REAL	Simpan Organizer (PENDING) bila login; fallback flag mock
	POST	/api/organizer/documents/upload	REAL	Upload berkas legalitas tersimpan fisik uploads/organizer-docs/
	GET / PUT	/api/organizer/profile	HYBRID REAL	Ambil & update data DB organizer (name, bank, npwp, phone)
	POST	/api/organizer/profile/avatar	REAL	Unggah foto profil tersimpan di uploads/avatars/
	POST	/api/organizer/profile/upload-portfolio	REAL	Upload berkas portofolio tersimpan di storage lokal
	POST	/api/organizer/profile/upload-deed	REAL (PARTIAL)	Berkas tersimpan fisik (URL belum ditulis ke kolom entity)
Refund Management EO	GET	/api/organizer/refunds	HYBRID REAL	Kueri refund DB via findByIdOrganizerId; fallback PENDING global
	GET	/api/organizer/refunds/detail	HYBRID REAL	Detail pengajuan refund tiket via findById DB
	PATCH	/api/organizer/refunds/{id}/status	HYBRID REAL	Update status refund di DB + catat adminNote & processedAt
Payout & Saldo EO	GET	/api/organizer/bank-accounts	HYBRID REAL	Daftar rekening bank penampung dari data DB organizer
	GET	/api/organizer/events/{id}/payout-balance	HYBRID REAL	Hitung otomatis saldo bersih event (90% withdrawable / 10% hold)
	GET / POST	/api/organizer/payouts	HYBRID REAL	Pengajuan payout tersimpan DB di refund_requests (organizerId terisi)
	GET	/api/organizer/payouts/detail	MOCK	Detail payout (param Long mismatch UUID → praktis selalu mock)
Manajemen Event EO (6 Stub)	GET	/api/organizer/events	MOCK STUB	Stub return [] (perlu service persist DB)
	POST	/api/organizer/events	MOCK STUB	Stub return random UUID DRAFT (body diabaikan)
	PUT	/api/organizer/events/update	MOCK STUB	Stub echo body update
	POST	/api/organizer/events/publish	MOCK STUB	Stub return status PUBLISHED (belum ke DB)
	GET	/api/organizer/events/draft	MOCK STUB	Stub return draft events []
	GET	/api/organizer/events/{id}/sales-summary	MOCK STUB	Stub return sales zeros
Ringkasan Dashboard EO (3 Stub)	GET	/api/organizer/status	HYBRID REAL	Cek verifikasi status pendaftaran EO dari DB organizers
	GET	/api/organizer/dashboard	HYBRID REAL	Statistik revenue & tiket terjual dari DB (flag real:true)
	GET	/api/organizer/dashboard/metrics	MOCK STUB	Stub cards metrics zeros
	GET	/api/organizer/dashboard/recent-events	MOCK STUB	Stub event terbaru []
	GET	/api/organizer/dashboard/recent-transactions	MOCK STUB	Stub transaksi terbaru []

CATATAN SINKRONISASI KODE & REKOMENDASI FRONTEND (rev. 14 Dual-Alias & Non-V1 Standard):

- **STANDAR BASE URL NON-V1:** Seluruh rute customer dan publik menggunakan prefix /api/... (misal: /api/events, /api/auth/..., /api/checkout/..., /api/organizer/...).
- **DUAL ALIAS MODUL ADMIN:** Controller Admin mendukung dual-mapping rute /api/admin/** dan /admin/** dengan otorisasi hasRole('ADMIN'), sehingga bebas error 500 saat dipanggil frontend.
- **Legal Controller Publik:** Dual mapping root /terms-conditions & /api/terms-conditions dengan permitAll di SecurityConfig (bebas login, verified live 200).
- **Avatar User & File Statis REAL:** Upload avatar divalidasi (image/5MB) dan tersimpan di uploads/avatars/. Konfigurasi WebConfig menyajikan file /uploads/** secara langsung.
- **Refund Order-Summary REAL:** Mengambil kalkulasi total & biaya admin langsung dari order jika ditemukan di DB (fallback Rp 295.000 jika order belum ada).
- **Midtrans Notification Publik:** Webhook /api/payments/midtrans-notification berstatus permitAll agar server gateway Midtrans dapat mengirimkan log callback.
- **Organizer Service Hybrid:** Mempertahankan 18 endpoint DB-backed + fallback flag, ditambah 9 stub baru (events & dashboard) dan POST /api/events/create (MOCK 201).
- **Backend Tanpa AI Agent / WebSocket:** Interaksi platform murni REST API standar. Entitas EoApplication, Payout, AdminSettings, dan RescheduleRequest **DILARANG** dibuat terpisah.
