PRODUCTION READY

Dokumen Spesifikasi Teknisal & Analisis Dependensi

"type": "module"

"private": true

ESM Native

TOTAL DEPENDENSI

9 Packages

Ringan & Minimalis

CORE FRAMEWORK

React ^18.3.1

Hooks & Context State

BUILD ENGINE

Vite ^5.4.10

Fast HMR & ESM Native

STYLING APPROACH

Plain CSS

Modular & Zero Overhead

RINCIAN PACKAGE DEPENDENSI 9 Items

KATEGORI	PACKAGE NAME	VERSI	FUNGSI & PERANAN UTAMA
Core Framework	react	^18.3.1	Core library UI (hooks, components, JSX)
Core Framework	react-dom	^18.3.1	Renderer untuk browser (mount/unmount component)
Routing & Nav	react-router-dom	^7.18.3	Client-side routing (SPA), nested routes, route guards
Build & Dev	vite	^5.4.10	Build tool + dev server (HMR, fast build, ESM native)
Build & Dev	@vitejs/plugin-react	^4.3.1	Plugin React untuk Vite (Fast Refresh, JSX transform)
UI & Icons	lucide-react	^1.46.0	Icon library (tree-shakable, SVG-based, 1000+ icons)
UI & Icons	react-icons	^5.7.0	Icon library tambahan (FontAwesome, Material, dll)
Authentication	@react-oauth/google	^0.13.5	Google Sign-In (GIS) button + credential handling
Notifications	sweetalert2	^11.26.25	Modal/alert customizable (confirm, toast, loading, custom HTML)

Konfigurasi & NPM Scripts

package.json

"type": "module" ESM (import/export)

"private": true Tidak dipublish ke npm

EXECUTION SCRIPTS:

npm run dev Dev server (HMR, port 5173)

npm run build Production build → dist/

npm run preview Serve hasil build lokal

Catatan Arsitektur Penting

Highlights

- Minimalist Stack:** Tidak menggunakan TypeScript, ESLint, Prettier, Testing lib (Jest/Vitest), maupun Redux/Zustand. State diproses via **React Context + localStorage**.
- Styling Strategy:** Murni **Plain CSS** (bukan Tailwind/Styled Components) dengan file .css terpisah per komponen + global styles.css.
- Auth Flow:** Mengandalkan **HttpOnly Cookie** dengan fallback ke localStorage, serta integrasi Google OAuth via @react-oauth/google.
- API Proxy:** Vite proxy merekayasa rute /api → ngrok/backend untuk menangani CORS dan enkapsulasi HttpOnly cookie.

Total: 9 dependencies (ringan, minimal, production-ready)
